

Leadership for Patient Safety

This module addresses the need for health and social care professionals to engage more effectively with the factors that fundamentally affect the provision of safe, effective and compassionate health care for patients.

Who is it for?

The programme is open to all health and social care professionals, including those in non-clinical healthcare leadership or management roles.

If you enrol on this course, you will:

- ✚ Improve your knowledge of the human factors in patient safety
- ✚ Learn about root cause and systems analysis
- ✚ Build skills in designing safer systems and learn how to contribute to developing a culture of safety.

As an employer, you will have the confidence that your employees will build skills in:

- ✚ Becoming more effective team workers
- ✚ Enhancing good communication skills, including in the new digital literacies
- ✚ Understanding what it takes to put patient safety at the forefront of service design.

Added Value

This is an online programme comprised of activities, discussions, collaboration and assessments, so making combining work, home and study easier.

The module is available as CPD and also as 15 or 30 University Master's level credits, which can be added to other Keele credits to build a MMedSci or as a stand-alone Postgraduate Award.
