

Systematic Training in Acute Illness Recognition and Treatment for Surgery (START Surgery)

START Surgery is an inclusive course designed for foundation doctors and medical students to advance their skills in managing acutely unwell surgical patients. You will benefit from a blend of practical workshops, data analysis, interactive lectures and eLearning.

Course content includes

You will participate in a variety of practical training sessions during the START Surgery course, including:

- Introduction to a system of patient assessment to facilitate data collection and planning
- The pathophysiology and recognition of clinical abnormalities in patients with respiratory, renal, circulatory and septic problems
- General considerations of the professional responsibilities and roles of the foundation trainee within the surgical team
- Advice on the mindset and skills needed to be a strong foundation trainee and for a future career in surgery

Learning outcomes

After attending this course, you should be able to:

- Begin to identify and manage critically ill surgical patients effectively
- Be able to demonstrate a systematic approach to assessing surgical patients
- Discuss the pathophysiology of critical illnesses following surgery
- Benefit from improved teamwork skills when managing a critically ill patient
